Product Professional with 2+ years shipping AI-powered product experiences, blending technical fluency (SQL, Python, LLMs, agentic workflows) with data-driven product discovery. Track record running experiments, defining success metrics, and using analytics to drive measurable business outcomes through AI automation. Partnering across Engineering, Design, Data Science, and Operations to turn data into scalable workflows.

SKILLS

- **Core Competencies:** Stakeholder Management, Requirement Gathering, Agile & Scrum, Roadmap Development, Product Lifecycle Management, KPI Tracking, Go-to-Market Strategy, Risk Management, Executive Communication, Structured Problem-Solving
- **Technical Skills:** SQL, Python (Data Analysis, Modelling, Automation - pandas, numpy), Power BI, Power Automate, JIRA, Confluence, Remedy, Data Pipelines & ETL, C++, Data Visualisation, NLP, Agentic AI, LLM, Version Control, Fast-API,
- **AI & Automation:** Agentic Workflows, LLM-Based Chatbots, Conversational AI, Prompt Engineering, Classification & Routing Systems, API Integrations (Graph API, JIRA API), GenAI, Machine Learning (Predictive Modelling, Targeting Frameworks), Agentic workflow orchestration and automation

PROFESSIONAL EXPERIENCE

ION Trading India Pvt. Ltd. – Fixed Income January 2024 – Present

Product Analyst

- Owned CSCompanion **end-to-end** — from **customer research** and **problem discovery** through design and launch — an **AI-powered product** using **LLM-based chatbots** and **agentic workflows** to classify, triage, and resolve JIRA tickets. Iterated based on **usage data** and **client feedback**, cutting resolution time by **30%**, manual triage effort by **50%**, and improving customer satisfaction by **18%**.
- Designed and deployed an automated **email classification** bot (Python, Graph API, JIRA API, Power Automate) that prioritised client issues and flagged follow-ups — reducing manual mailbox monitoring by **80%**, response time from 2 hours to **30 minutes**, and improving SLA adherence by **15%**.
- Built a **workload-balancing system** auto-assigning issues by availability and timezone — increasing resolution throughput by **25%**, reducing backlog by **40%**, and improving team satisfaction by **20%**.
- **Automated** logging-shift scheduling, saving **~10 hours/month**, improving shift coverage accuracy to **99%**, and cutting scheduling conflicts by **70%**.
- First point of contact for clients — gathered requirements and translated them into **user stories, functional requirements, and acceptance criteria** with attention to **data accuracy and access controls** across client-facing systems.
- Conducted **root cause analysis** on 2000+ customer issue tickets, identified top recurring failure categories, and authored troubleshooting guides — cutting developer escalation rate by **44%** and post-launch client queries by **~35%**.
- **SME for Tradeweb Markets** — advised on trading workflows, troubleshot complex scenarios, and ensured seamless client-system integration, enabling faster onboarding.
- Defined scope and deliverables for **10+ market feature releases** (Portfolio Trading, Trade-At-Close, UKMTF, EUMTF) across gateway, GUI, and QA with Bloomberg, Tradeweb, and MarketAxess — **zero critical post-go-live defects** from scope gaps.
- Drove systematic triage of D2C Shield backlog, achieving a **historic low in backlog volume** and freeing capacity for high-priority work.
- Translated client trading workflows into requirements, maintained **living documentation**, and identified/mitigated **delivery risks** around regulatory deadlines and scope changes.
- Delivered **prototype demos** to premium clients, accelerating go-live decisions; mentored junior team members on technical problem-solving.
- Developed and presented **Gen AI/prompt engineering** training org-wide, accelerating adoption of LLM tools including **Microsoft Copilot**.

Samsung R&D October 2022 – May 2023

Research Intern – Samsung Prism

- Coordinated with a team of **4+ members and 2 mentors** from the R&D department of Samsung.
- Focused on **video content analysis**, applying machine learning models to extract meaningful insights from large datasets.
- Contributed to model development and evaluation, improving accuracy of content classification and supporting research objectives

Defense Innovation Organization (DIO) May 2022 – July 2022

Intern - Data Collection and Analysis over Social Media

- Collaborated with the **Ministry of Defense** under **iDEX and DIO** on a strategic analytics initiative by building workflows using **Twitter APIs** to capture and process **real-time social media data**.
- Used **Python** (pandas, scikit-learn) for **data preprocessing, sentiment analysis, and predictive modeling** and delivered **actionable insights** that strengthened situational awareness for defense stakeholders.
- Improved data classification accuracy by **~20%** and scaled processing to **50,000+ tweets/day**.

EDUCATION

MBA - AI in Business July 2025 – Present

Birla Institute of Technology and Science (BITS) - Pilani

WILP (Work Integrated Learning Programme)

B.E. - Computer Science Engineering (Minor in Conversational AI) July 2020 – July 2024

Thapar Institute of Engineering and Technology

CG – 9.29

- Merit scholarship for **Outstanding Academic Perfomance** 4 years in a row, for the terms of 2020-2024
- Class Representative of the entire batch of CSE (800 students), President - Thapar Toastmasters Club, General Secretary - Rotaract Club of TIET DB, Joint Secretary - MLSC (Microsoft Learn) Management Head - Mudra Society (Cultural Society)
